

Au vu du contexte sanitaire lié à la propagation du coronavirus, les modalités d'organisation et d'évaluation des unités d'enseignement ont pu, dans différentes situations, être adaptées ; ces éventuelles nouvelles modalités ont été -ou seront- communiquées par les enseignant-es aux étudiant-es.

5 crédits	30.0 h	Q2
-----------	--------	----

Enseignants	Agrell Per Joakim ;Chevalier Philippe ;Jourquin Bart (supplée Chevalier Philippe) ;
Langue d'enseignement	Anglais
Lieu du cours	Louvain-la-Neuve
Préalables	This course is reserved for students with a bachelor's degree in business engineering or students with equivalent quantitative method skills.
Thèmes abordés	This advanced course describes the logistics systems, their managerial objectives and the current trends in the development of advanced decision support systems. In particular, emphasis is put on modeling and solving logistics problems using state-of-the-art approaches. The transportation, distribution and warehousing functions will be studied in details through lectures and case studies.
Acquis d'apprentissage	<p>During their programme, students of the LSM Master's in management and Master's in Business engineering will have developed the following capabilities'</p> <p>KNOWLEDGE AND REASONING</p> <ul style="list-style-type: none"> • Master highly specific knowledge in one or two areas of management : advanced and current research-based knowledge and methods. <p>A SCIENTIFIC AND SYSTEMATIC APPROACH</p> <ul style="list-style-type: none"> • Consider problems using a systemic and holistic approach : recognize the different aspects of the situation and their interactions in a dynamic process. <p>¹ WORK EFFECTIVELY IN AN INTERNATIONAL AND MULTICULTURAL ENVIRONMENT</p> <ul style="list-style-type: none"> • Understand the inner workings of an organization : develop a global approach and integrate the internal logic used within the organization. • Position and understand the functioning of an organization, in its local and international socio-economic dimensions and identify the associated strategic issues and operational decisions. <p>TEAMWORK AND LEADERSHIP</p> <ul style="list-style-type: none"> • Work in a team :Join in and collaborate with team members. Be open and take into consideration the different points of view and ways of thinking, manage differences and conflicts constructively, accept diversity. <p>-----</p> <p><i>La contribution de cette UE au développement et à la maîtrise des compétences et acquis du (des) programme(s) est accessible à la fin de cette fiche, dans la partie « Programmes/formations proposant cette unité d'enseignement (UE) ».</i></p>

<p>Modes d'évaluation des acquis des étudiants</p>	<p>En raison de la crise du COVID-19, les informations de cette rubrique sont particulièrement susceptibles d'être modifiées.</p> <p>Continuous evaluation</p> <ul style="list-style-type: none"> • Date: <i>To be specified late</i> • Type of evaluation: <i>Group work (I&II)</i> • Comments: <i>No</i> <p>Evaluation week</p> <ul style="list-style-type: none"> • Oral: <i>No</i> • Written: <i>No</i> • Unavailability or comments: <i>No</i> <p>Examination session</p> <ul style="list-style-type: none"> • Oral: <i>No</i> • Written: <i>2 hours</i> • Unavailability or comments: <i>Continuous evaluation activities will not be organized for the September session, this part of the evaluation for the grade in September will be based on the activities of the semester.</i>
<p>Contenu</p>	<p>The class mixes - lectures with additional individual readings and exercises, - solution of cases in groups: design and implementation of solutions . Content : 1. Introduction to logistics systems: - Logistics systems - Managerial issues and trends - Decision support systems 2. Models and methods - Network Optimisation models and methods, - Mixed Integer Programming and decomposition methods, - Heuristic optimisation methods. 3. Design of Logistics Network 4. Design and Operation of Warehouses 5. Planning and Scheduling for Long-Haul Freight Transportation 6. Planning and Scheduling for Short-Haul Freight Transportation Methods : In-class activities 1 Lectures 1 Exercices/PT 1 Project based learning At home activities 1 Readings to prepare the lecture 1 Exercices to prepare the lecture 1 Paper work 1 Students presentation</p>
<p>Bibliographie</p>	<p>: No TEXTBOOK. and available on line . No book protected by copyright. . READING FILE compulsory and available on line Supports available on line are on ICAMPUS.</p>
<p>Autres infos</p>	<p>Evaluation : - Case solutions including class presentations, - Written exam (open book) with open questions and exercises. References : - Stadler H., C. Kilger (Eds), Supply chain management and advanced planning : concepts, models, software and case studies , 2d edition, Springer, 2002. - Y. Pochet, L.A.Wolsey: Production Planning by Mixed Integer Programming , Springer, 2006. - Introduction to Logistics Systems Planning & Control, Ghiani, Laporte, Musmanne, Wiley 2004. Additional and more specialized references will be provided during the class Internationalisation : 1 international content (does the course tackle international issues related to the course content ?) 1 international case study Corporate features : 1 case study 1 corporate guest Skills : 1 presentation skills 1 writing skills 1 team work 1 problem solving 1 decision making 1 critical thinking Techniques and tools for teaching and learning : 1 IT tools 1 modelling 1 quantitative methods 1 mathematics</p>
<p>Faculté ou entité en charge:</p>	<p>CLSM</p>
