

En raison de la crise du COVID-19, les informations ci-dessous sont susceptibles d'être modifiées, notamment celles qui concernent le mode d'enseignement (en présentiel, en distanciel ou sous un format comodal ou hybride).

5 crédits	30.0 h	Q1
-----------	--------	----

Enseignants	Reuter Carsten ;
Langue d'enseignement	Anglais
Lieu du cours	Louvain-la-Neuve
Thèmes abordés	This course will address environmental, social and ethical risks, and new business opportunities arising from managing the natural environment. This course will also look at responses at a strategic and operational level: sustainable innovation and green supply chain management, environmental management systems and certification (ISO 14001, EMAS, etc.), supplier code of conducts, sustainable supplier selection and supplier development, waste reduction, eco-efficiency, greenwashing, child labour and labour safety. The focus is not only on operations of the focal firm, but particularly also on sustainability challenges that unfold along globally dispersed supply chains.
Acquis d'apprentissage	<p>During their programme, students of the LSM Master's in management and Master's in Business engineering will have developed the following capabilities'</p> <p>CORPORATE CITIZENSHIP</p> <ul style="list-style-type: none"> • Demonstrate independent reasoning, look critically and consciously acquired knowledge (both academic and common sense) and managerial practices, in light of emerging circumstances and their outcomes. • Decide and act responsibly, while taking into account the social, economic and environmental sometimes antinomic, outcomes in the short, medium and long term, for the various stakeholders. <p>A SCIENTIFIC AND SYSTEMATIC APPROACH</p> <p>1</p> <ul style="list-style-type: none"> • Perceptively synthesize the essential elements of a situation, demonstrating a certain conceptual distance, to diagnose and identify pertinent conclusions. <p>WORK EFFECTIVELY IN AN INTERNATIONAL AND MULTICULTURAL ENVIRONMENT</p> <ul style="list-style-type: none"> • Position and understand the functioning of an organization, in its local and international socio-economic dimensions and identify the associated strategic issues and operational decisions. <p>TEAMWORK AND LEADERSHIP</p> <ul style="list-style-type: none"> • Work in a team : Join in and collaborate with team members. Be open and take into consideration the different points of view and ways of thinking, manage differences and conflicts constructively, accept diversity. <p>-----</p> <p><i>La contribution de cette UE au développement et à la maîtrise des compétences et acquis du (des) programme(s) est accessible à la fin de cette fiche, dans la partie « Programmes/formations proposant cette unité d'enseignement (UE) ».</i></p>
Modes d'évaluation des acquis des étudiants	<p>En raison de la crise du COVID-19, les informations de cette rubrique sont particulièrement susceptibles d'être modifiées.</p> <p>Assessment will be based on the following</p> <ul style="list-style-type: none"> • 30%: Case Study Presentation (in teams, during lecture period) • 20%: Critical Review (Peer-Assessment) of presented Case Study (in teams, during lecture period) • 50%: Written Exam in January
Méthodes d'enseignement	<p>En raison de la crise du COVID-19, les informations de cette rubrique sont particulièrement susceptibles d'être modifiées.</p> <p>The format is based on active learning and includes lectures, case studies, videos, incidents and class discussion, qualified speakers and team work in sustainability management.</p> <p>The course provides time for questions and discussion among the instructors, the speakers, and the students, giving students valuable insights into how sustainability is managed in the real world.</p> <p>Students will read case studies and some background material designed to help them answer the questions posed at the end of each case exercise.</p>
Contenu	In the 21st century, a company cannot maintain its competitive position or achieve continuous operating improvement without the successful implementation of strategic, well-designed, and well-implemented

	<p>sustainability initiatives. Sustainability improvements are critical at many points in an organization's value chain, from initial product conception to production/manufacturing, distribution, and waste disposal.</p> <p>A sustainable, socially responsible, and financially-driven company must develop, analyze, select, and implement measures that will help it capitalize on the opportunities for improved operating performance, and that will mitigate the inevitable unfavorable effects of business operations. This requires managers who can identify potential threats and challenges, develop strategies to address such challenges, conduct the evaluations of competing alternatives, and make the fact-based decisions. It also requires managers to articulate the decisions to broad sets of stakeholders (i.e., the facility manager, the chairman of the board, individual employees, community organizations, governmental/regulatory agencies).</p> <ul style="list-style-type: none"> - Introduction to the basics of supply chains, value chains and related specific management concepts - Identification and management of risks along the value chains, i.e. within and between companies - Challenges and concepts for the transparent representation of value chains resp. supply chains - Challenges and innovative concepts for a more sustainable design of value chains (e.g. Sharing Economy, Closed-loop Supply Chains, Additive Manufacturing) - Challenges of digital value chains
