

4.00 crédits	30.0 h + 15.0 h	Q2
--------------	-----------------	----

Cette unité d'enseignement n'est pas accessible aux étudiants d'échange !

Enseignants	Laurier Wim ;
Langue d'enseignement	Anglais
Lieu du cours	Bruxelles Saint-Louis
Acquis d'apprentissage	<p>A la fin de cette unité d'enseignement, l'étudiant est capable de :</p> <ul style="list-style-type: none"> • Expliquer l'importance des technologies de l'information et de la communication (TIC) et des systèmes d'information (SI) pour le management • Comprendre l'importance stratégique des TIC et des SI • Appliquer les pratiques des TIC et des SI dans un contexte commercial • Utiliser les applications des TIC et des SI dans d'autres cours • Interpréter le code d'un algorithme informatique • Expliquer le code d'un algorithme informatique • Développer un algorithme informatique sur la base d'une spécification
Modes d'évaluation des acquis des étudiants	<p>The summative assessment is a written closed-book examination of three hours composed of two parts. The first part relates to the introduction to ICT management and infrastructure and assesses the student's ability to reproduce and paraphrase the definitions of concepts that make up the basic vocabulary of a computer scientist, as well as argue the importance of computer science in management as a synthesis of the curriculum. The second part relates to the introduction to programming. The questions will mix basic aspects (e.g., interpretation/understanding/evaluation of Python code), concepts seen in the course, and practical questions of algorithm development, and production of a program meeting a given specification. A "cheat sheet" containing a summary of relevant the Python syntax will be available during the exam. Students will need to pass both parts individually to pass the exam, be it with a tolerance. More precisely, the student's final grade for the summative assessment will be average of the scores obtained for each part in case a score of at least 8/20 is obtained for each part individually. As soon at least one of both scores is below 8/20, the lowest score is the final grade.</p>
Méthodes d'enseignement	<p>Introduction to ICT management and infrastructure:</p> <ul style="list-style-type: none"> • Independent study of the course book (equivalent to 15h of in class) • Online self-evaluation tests on MoodleUSL-B <p>Introduction to programming:</p> <ul style="list-style-type: none"> • 15 hours of face-to-face lectures • 15 hours of exercises in the computer lab
Contenu	<p>ORGANIZATIONS, MANAGEMENT, AND THE NETWORKED ENTERPRISE</p> <ul style="list-style-type: none"> - Information Systems in Global Business Today - Global E-Business and Collaboration - Information Systems, Organizations, and Strategy - Ethical and Social Issues in Information Systems <p>INFORMATION TECHNOLOGY INFRASTRUCTURE</p> <ul style="list-style-type: none"> - IT Infrastructure and Emerging Technologies - Foundations of Business Intelligence: Databases and Information Management - Telecommunications, the Internet, and Wireless Technology - Securing Information Systems <p>Introduction to programming (by using Python)</p> <p>What is an algorithm?</p> <p>Control structures</p> <ul style="list-style-type: none"> - Sequences - Choices (if) - Loops (for en while) <p>Modular programming</p> <ul style="list-style-type: none"> - Functions

	- Procedures
Autres infos	<p>There will be weekly office hours (2 hours per week) to answer student questions about the self-assessment and study method once the introduction to programming part is over.</p> <p>The Python “cheat sheet” and the online self-evaluation quizzes will be available on Moodle from the start of the semester on.</p>
Faculté ou entité en charge:	ESPB
