| Teacher(s)                  | Scalliet Pierre coordinator ;   |  |  |  |  |
|-----------------------------|---|--|--|--|--|
| Language :                  | French  |  |  |  |  |
| Place of the course         | Bruxelles Woluwe  |  |  |  |  |
| Main themes                 | Unsealed sources: specific operational radioprotection; problems in a TEP unit, international recommendation<br>and specific legislation; quality control; dose to patient evaluation (advanced discussions); dose optimisation<br>conditions for hospitalisation and waste disposal (type of instructions, new radioprotection techniques, specia<br>paediatric questions). Radiotherapy: specific operational radioprotection; legislation and international norms<br>quality control and quality assurance program ; evaluation and optimisation of dose to patient (advance<br>discussion) ; new techniques in radioprotection ; specific paediatric question ; sealed sources in brachytherapy<br>procedures for loading and unloading sources ; quality control and source storage conditions ; type of instructions t<br>the patients. Imaging: specific operational radioprotection; legislation and international norms ; quality control an<br>quality assurance program ; evaluation and optimisation of dose to patient (advance<br>in radioprotection ; specific paediatric question for control/ and<br>sources for loading of the risk of radioactive rejections in the environment in normal and accidental situatio<br>and emergency plans for the nuclear risks) must be followed as prerequisite : iodine administration in the ever<br>of nuclear accident. |  |  |  |  |
| Aims                        | The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".   |  |  |  |  |
| Faculty or entity in charge | CRPR  |  |  |  |  |
