## Current landscapes seminar

In view of the health context linked to the spread of the coronavirus, the methods of organisation and evaluation of the learning units could be adapted in different situations; these possible new methods have been - or will be - communicated by the teachers to the students.

3 credits	30.0 h	Q2

	T		
Teacher(s)	Dujardin Denis ;		
Language :	French		
Place of the course	Bruxelles		
Main themes	This course provides an introduction to contemporary theories and practices of landscape projects. It is based on a tension between the acquisition of fundamentals (definition of the landscape concept and major references for the different historical typologies of projects/practices) on the one hand, and contemporary landscape issues such as climate adaptation, water management, urban development, etc. on the other hand. The fundamentals developed in the course are put into perspective in the face of contemporary challenges/practices thanks to the participation of an annual visiting professor involved in applied approaches and research.		
	The articulation between the provision of fundamentals and the presentation of applied approaches allows the student to:		
	<ul> <li>Acquire knowledge and a reference framework on the concept of landscape in its various approaches (sensitive, geographical, environmental, etc.);</li> <li>Question and critically examine the current status of the landscape issue in the context of current territorial development;</li> </ul>		
Aims	At the end of the course, students will be able to:		
	Mobilize other disciplines		
	<ul> <li>to refer to theoretical and practical foundations of the landscape concept and to situate them in their spatial and temporal contexts;</li> </ul>		
	Locate their action		
	<ul> <li>to situate and critically examine landscape approaches and productions in the context of the territorial development of the city of the 21st century;</li> </ul>		
	The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".
