Aims	<p>To give students with no legal training a basic course on the state and its institutions, the place that citizens occupy in it, and the complex techniques of public decision-making, particularly in Belgium. Using as a basis the foundations of law as taught on the first preparatory course, this course will teach the rudiments of Belgian constitutional law; these will be presented within a panorama of the structures and political systems with which states have equipped themselves. It will describe the broad outlines of the organisation and functioning of federal, regional, community and local institutions, and will address the ways in which correct decision-making procedures are monitored, and the mechanisms employed to ensure the institutions' cooperation. The course will also introduce the status of Belgian nationals, and the status and fundamental rights of foreigners.</p> <p>1</p> <p>----</p> <p><i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i></p>
