

In view of the health context linked to the spread of the coronavirus, the methods of organisation and evaluation of the learning units could be adapted in different situations; these possible new methods have been - or will be - communicated by the teachers to the students.

5 credits	30.0 h + 22.5 h	Q2
-----------	-----------------	----

Teacher(s)	Glineur François ;
Language :	French
Place of the course	Louvain-la-Neuve
Aims	<i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i>
Evaluation methods	<b>Due to the COVID-19 crisis, the information in this section is particularly likely to change.</b> Students will be evaluated with an individual written exam, based on the above-mentioned objectives. Students also carry out a project in small groups, whose evaluation is taken into account for the final grade.
Teaching methods	<b>Due to the COVID-19 crisis, the information in this section is particularly likely to change.</b> This course is comprised of lectures, exercise sessions and computer labs, as well as a project to be carried out in small groups. Consulting is available for help with the project.
Content	<b>Linear optimization:</b> Introduction, canonical formulations, polyhedral geometry, simplex algorithm, duality et sensitivity analysis, introduction to discrete optimization (branch & bound). <b>Nonlinear optimization:</b> <i>Models</i> : definitions and terminology, optimality conditions for unconstrained and constrained problems ; recognize and exploit convexity of a problem. <i>Methods</i> : line-search methods for unconstrained problems (gradient, Newton and quasi-Newton methods) ; convergence properties (local and global) ; implementation details ; introduction to other types of methods.
Inline resources	Course documents (slides, notes and exercises) are available on Moodle : <a href="https://moodleucl.uclouvain.be/course/view.php?id=9200">https://moodleucl.uclouvain.be/course/view.php?id=9200</a>

Programmes containing this learning unit (UE)				
Program title	Acronym	Credits	Prerequisite	Aims
Approfondissement en statistique et sciences des données	LSTAT100P	5		
Additional module in computer science	LSINF110P	5		
Additional module in Mathematics	LMATH100P	5		
Minor in Engineering Sciences: Applied Mathematics (only available for reenrolment)	LMAP100I	5		
Master [120] in Electrical Engineering	ELEC2M	5		
Master [120] in Computer Science and Engineering	INFO2M	5		
Specialization track in Applied Mathematics	LMAP100P	5		
Master [120] in Chemical and Materials Engineering	KIMA2M	5		
Minor in Applied Mathematics	LFSA136I	5		
Master [120] in Computer Science	SINF2M	5		
Master [120] in Statistic: General	STAT2M	5		
Bachelor in Mathematics	MATH1BA	5
