

Due to the COVID-19 crisis, the information below is subject to change, in particular that concerning the teaching mode (presential, distance or in a comodal or hybrid format).

4 credits	30.0 h	Q1

Teacher(s)	De La Croix David ;				
Language :	French				
Place of the course	Louvain-la-Neuve				
Aims	The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".				
Evaluation methods	Due to the COVID-19 crisis, the information in this section is particularly likely to change. Written exam aimed at evaluating the understanding by students of the economic mechanisms seen in class				
Teaching methods	Due to the COVID-19 crisis, the information in this section is particularly likely to change. Ex catedra teaching, exercices et applications.				
Content	The course addresses the question of economic development and growth from two angles: the temporal dimension which analyzes the takeoff and the growth of developed countries during the last centuries; the cross section dimension which focuses on the existing differential development between rich and poor countries. In a first step we will consider a series of data relating to development on long period, as well as other aspects of the development process. A second step is devoted to analysis of development mechanisms, including the model of stagnation - the Malthusian model, the model of growth of Solow model, the endogenous growth with human capital, and the unified growth theory. In a third and final stage, we detail a series of factors considered important for growth: savings, technical progress, education, institutions.
