Teaching methods	<p>Due to the COVID-19 crisis, the information in this section is particularly likely to change.</p> <p>This course is delivered as face-to-face, online or hybrid depending on the health situation.</p> <p>The course follows the communicative notional-functional method.</p> <p>This learning module is taught in the form of contact hours using the communicative, lexical and grammatical approach.</p>
Content	<p>The course is based on communication and the methodology is a blend between the communicative and the notional-functional approaches. Notions of code are not acquired through the learning of vocabulary lists or an exclusively structural approach to grammar. These are integrated into meaningful contexts and grouped according to functional content (asking for and providing personal details, talking about everyday activities, spare time and tastes, describing a city, suggesting activities, etc.). They are subsequently practised in the form of exercises requiring the development of a global communicative competence.</p> <p>The didactic materials include very detailed grammatical referencing and drilling exercises common to the structural approach, but the typology of the exercises and the basic materials are very heterogeneous : songs, games, role-playing, authentic or abridged texts, advertisements, etc.</p>
