

Due to the COVID-19 crisis, the information below is subject to change, in particular that concerning the teaching mode (presential, distance or in a comodal or hybrid format).

5 credits	30.0 h	Q2
-----------	--------	----

Teacher(s)	Guay Alexandre ;Sartenaer Olivier (compensates Guay Alexandre) ;
Language :	French
Place of the course	Louvain-la-Neuve
Main themes	This course does not deal with special epistemology, which concerns the fundamentals of a specific type of knowledge (human or natural sciences), but with general epistemology, also known as the theory of knowledge. It will cover the heavily gnoseological thought processes (reasoning, judging, believing, etc.). We will highlight the obstacles to knowledge (doubt, error, sensorial or cognitive illusions, cognitive bias, theoretical load, etc.), as well as some of the means that are supposed to help overcome them. We will present and discuss the main historical epistemological movements (empiricism and rationalism, idealism and realism, the nature of truth, etc.), but also the more contemporary, and in some cases the more recent, positions (internalism and externalism, foundationalism and coherentism, evidence-based knowledge, social constructivism, etc.).
Aims	<p>By the end of this course, students will have learned the basic concepts of philosophy's great theories of knowledge. They will understand how a debate can, reasonably and critically, claim to be valid. They will realise that there are many answers to the question 'what can I know?' In other words, what are the nature, methods and limits of knowledge?</p> <p>1</p> <p>-----</p> <p><i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i></p>
Bibliography	Les différentes ressources bibliographiques seront postées en accès restreint sur la page Moodle du cours.
Faculty or entity in charge	EFIL
