

Due to the COVID-19 crisis, the information below is subject to change, in particular that concerning the teaching mode (presential, distance or in a comodal or hybrid format).

19 credits

Q2

Teacher(s)	De Smet Charles (coordinator) ;
Language :	French
Place of the course	Bruxelles Woluwe
Aims	<i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i>
Evaluation methods	Due to the COVID-19 crisis, the information in this section is particularly likely to change. The skills acquired in the methodology and the experimental approach are evaluated, on the basis of a scientific report written by the student and an oral defense.
Teaching methods	Due to the COVID-19 crisis, the information in this section is particularly likely to change. The student will be followed by his internship promoter, for the realization of the experimental project and the writing of the scientific report.
Content	During this activity, the student is integrated for several months in a research laboratory in biomedical sciences. He will carry out the first part of an original research project, which will be continued during the laboratory research internship part 2 (WSBIM2297).
Other infos	Access to this professional integration activity is subject to conditions (see regulations of the School of Biomedical Sciences).
Faculty or entity in charge	SBIM
