Q1

Teacher(s)	De La Croix David ;Lefèvre Mélanie (compensates De La Croix David) ;
Language :	French
Place of the course	Louvain-la-Neuve
Main themes	Traits fundamental economic growth, covering a dual aspect: the transition to a world of growth (industrial revolution and demographic transition), and the income disparities between countries. In addition to the dimension of per capita income, should be addressed demographic aspects, technological, distribution of income and gender equalities. The various models: Malthus (non-growth), neoclassical growth, endogenous growth. The factors of growth and development policy: the capital and development assistance, technology, human capital and education, birth control, and institutions (corruption, social fragmentation, democracy).
Aims	<p>Over the last twenty years, understanding of the mechanisms underlying the process of growth and development has developed considerably. This Growth and Development course aims to make students familiar with the principal mechanisms invoked in the literature, and related empirical data. By the end of the course, the student should be able to distinguish the contributions of the various models and discuss the factors underlying divergences in revenue between countries.</p> <p>1</p> <p>-----</p> <p><i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i></p>
