Evaluation methods	Oral exam.
Teaching methods	Ex-cathedra course. Lectures a lot of emphasis will be placed on the critical reading of theoretical texts and the analysis of extracts of (popular) literary texts.
Content	The aim of this course is to promote the study of the various and complex relationships that a literary text, popular or not, has with the social reality. From such a perspective, the following aspects will be given particular attention: the selection and/or perfecting of concepts, as well as the development of critical discourses through which it is possible to explain, at a given time (the contemporary era) and place (the Francophone world), the functioning of the editorial field and the place literature has in it as a symbolic, cultural and social practice. Procedures will also be developed for the formal analysis of (popular) literary texts which, coupled with the study of their conditions of production and reception, can unveil the mechanisms of allocation of literary value and, as a consequence, the process of legitimization of texts, as well as authors, in the studied field.
Bibliography	Une bibliographie sélective est communiquée aux étudiants
Other infos	Extracts from theoretical and literary works
