In the event of a second session, the same conditions apply. Teaching methods	Type of teaching 1. Lectures 2. Presentation of visual documents 3. Case studies 4. Call for reactions, comments, reflection 5. Personal notes 6. Texts and documents available on I-campus (bibliography, complementary texts)
Content	The course explores each year in a critical and reflexive way certain crucial aspects of film productions (the implications of digital technology, the documentary component and its multiple appropriations, the ecological dimension of cinema, the dramaturgical and scenaristic aspects...)
Other infos	Many of the themes can be developed in final essays of 60 and 120 master program
