Q1

Teacher(s)	G�rard Anne-Catherine (compensates Knoops Bernard) ;Knoops Bernard ;
Language :	French
Place of the course	Louvain-la-Neuve
Prerequisites	To follow this course, it is necessary to master the knowledge and skills developed in the courses LBIO1111 and LBIO1112
Learning outcomes	
Evaluation methods	Oral examination with written preparation or written examination only. The questions will concern the material seen during the course ex cathedra but also during the practical work.
Teaching methods	Ex cathedra course and practical work (observations under the microscope).
Content	During this course, we will establish the bases of the histological and functional study of the main tissues of mammals. The theoretical concepts taught during the lecture will be followed by practical sessions during which students will examine and describe histological sections as well as images of electron microscopy. Histological and functional study of: covering epithelia and glandular epithelia; non-specialized connective tissue and specialized connective tissue including adipose, cartilage and bone tissue; blood cells and lymphoid organs; skeletal muscle, heart muscle and smooth muscle; central nervous system and peripheral nervous system.
