

5.00 credits	30.0 h	Q1
--------------	--------	----

Teacher(s)	Sinigaglia Nadia ;
Language :	French
Place of the course	Mons
Main themes	<p>Part I: Strategy principles</p> <ol style="list-style-type: none"> 1. Introduction to key concepts of strategy 2. Strategic Analysis: A Comprehensive Framework 3. From corporate strategy to innovation strategy: definition and implementation <p>Part II: Strategy implementation and management</p> <ol style="list-style-type: none"> 1. The balanced scorecard: a strategy implementation management tool 2. The 4 perspectives of the balanced scorecard 3. The key performance indicators 4. Determination and role of benchmarks (efficiency frontiers methods) 5. The strategy map: cause-and-effect links between the indicators of the balanced scorecard perspectives
Learning outcomes	<p>At the end of this learning unit, the student is able to :</p> <p>Competencies</p> <p>Given the « competencies referential » linked to the LSM Master in Management and in Business Engineering, this course mainly develops the following competencies:</p> <ul style="list-style-type: none"> • 2.4 Activate and apply the acquired knowledge accordingly to solve a problem. • 3.3 Consider problems using a systemic and holistic approach: recognize the different aspects of the situation and their interactions in a dynamic process. • 3.4 Perceptively synthesize the essential elements of a situation, demonstrating a certain conceptual distance, to diagnose and identify pertinent conclusions. • 5.1 Understand the inner workings of an organization: develop a global approach and integrate the internal logic used, within the organization. • 5.2 Position and understand the functioning of an organization, in its local and international socio-economic dimensions and identify the associated strategic issues and operational decisions. • 8.2 Interact and discuss effectively and respectfully with diverse stakeholders (supervisors, peers, colleagues, clients...) in face-to-face and group contexts, using both verbal and nonverbal communication skills: demonstrate the ability to listen, empathize, be assertive, provide and accept constructive criticism. <p>Learning Outcomes</p> <p>At the end of this learning unit, the student is able to:</p> <ul style="list-style-type: none"> • master the key concepts underlying the development of a business strategy in environments that are both highly competitive and innovative, from the strategic analysis prior to the definition of the strategy to the implementation of the strategy and its management. • understand the key elements and stages of a strategic deployment. • conduct a strategic analysis and identify the possible strategies at the end of this diagnosis. • translate a company's strategy into strategic objectives to be achieved. • develop a balanced scorecard by choosing the performance indicators to monitor the implementation of the strategy adopted. • understand the complex links between the different indicators and perspectives of the balanced scorecard.

<p>Evaluation methods</p>	<p>Student evaluation will be determined by:</p> <ul style="list-style-type: none"> • A written exam organized during the mid-term week (40% of the final grade): students will have to answer questions on the whole content of the course, also including (1) scientific and managerial articles discussed in class, and (2) case studies and exercises. The open questions can relate both to specific points of the course content and to more general aspects of the covered topics requiring a step back from the concepts taught. • The report linked to the group project (45% of the final grade): students will be required to carry out a teamwork allowing them to understand the complete strategic approach underlying the strategic management of a company, ranging from the definition of the strategy to its implementation management by means of a balanced scorecard (comprising at least 2 axes and all the links between the various indicators proposed). The guidelines for this group work will be given during the first session of the course. • The completion of the case studies during the course, as well as the discussion of the suggested readings (15% of the final grade) <p>In case of registration to the second exam session, only the “written exam” part can be improved (The grades linked to the group project report as well as to the active participation during the case studies and the readings discussion remain unchanged for all exam sessions of the current academic year).</p> <p><i>Note : In the group and individual work assigned in this course, information sources must systematically be cited, according to the academic references standards. In case the student has used a generative AI, s/he must systematically mention the parts of his/her work in which s/he used this tool, by adding a bottom page note indicating if the generative AI tool has been used and the purpose of this use (information search, text writing and/or text revising). The student remains responsible for the content of its production, independently of the references used. Thus, by submitting a group or individual work report for evaluation, the student asserts that: (i) it accurately reflects the phenomenon studied, and to do so, s/he must have verified the facts; (ii) s/he has respected all specific requirements of the work assigned to her/him, in particular requirements for transparency and documentation of the scientific approach implemented. If any of these assertions are not true, whether by intent or by negligence, the student has violated his/her commitment to truth with respect to the piece of knowledge produced in the context of his/her work, and possibly to other aspects of academic integrity, which constitutes academic misconduct and will be considered as such.</i></p>
<p>Teaching methods</p>	<p>The course is organized in two to three-hour sessions, alternating between the presentation of theoretical concepts, case studies, teamwork, readings of scientific as well as managerial articles. Students are expected to read these articles in depth, in preparation for class sessions, so that they can discuss the content informally during class.</p>
<p>Content</p>	<p>This course is made up of two parts. The first part aims at presenting the principles of strategy, from the strategic analysis - external and internal - to the definition and implementation of the chosen strategy. The second part deals with the strategy implementation management using balanced scorecards.</p> <p>Part I : Principles of Strategy</p> <ol style="list-style-type: none"> 1. Introduction to key concepts of strategy 2. Strategic analysis: a comprehensive framework 3. From corporate strategy to innovation strategy: definition and implementation <p>Part II : Strategy implementation and management</p> <ol style="list-style-type: none"> 1. The Balanced Scorecard: a strategy implementation management tool 2. The 4 perspectives of the balanced scorecard 3. The Key Performance Indicators 4. Determination and role of benchmarks (efficiency frontiers methods) 5. The strategy map: causal relationships between strategic goals/indicators of the 4 perspectives of the BSC
