Génétique moléculaire médicale

2.00 credits	15.0 h	Q1

Teacher(s)	. SOMEBODY ;De Leener Anne ;Helaers Raphaël ;Revencu Nicole ;Vikkula Miikka (coordinator) ;
Language :	French > English-friendly
Place of the course	Bruxelles Woluwe
Learning outcomes	
Evaluation methods	Evaluation is based on presence and interaction during ocurses, and the presentation of a chosen article.
Teaching methods	Critical reading of articles, oral presnetation of one article, and interaction during each presentation.
Content	The course focuses on scientic articles that cover variable domains of genetic medicine (clinics, diagnostic work-up, genetic analyses, etc). Basic concepts will be recalled and illustrated via various human pathologies, representing varied medical specialities.
Inline resources	A series of publications will be suggested to students, but the article to be evaluated and presented can be chosen outside this list.
Bibliography	- Biologie Moléculaire et Médecine (3è éd), JC Kaplan & M Delpech, Ed Flammarion Médecine-Sciences - New Clinical Genetics D. Donnaï and A Read ; Scion Publ 2nd Edition - Génétique médicale: de la biologie à la clinique ; Ed De Boeck - Human Molecular Genetics. P Strachan ; Garland Sc
