45.0 h + 15.0 h

Q2

Teacher(s)	Grandjean Gilles ;
Language :	French
Place of the course	Bruxelles Saint-Louis
Learning outcomes	<p>At the end of this learning unit, the student is able to : This course aims to provide students with a general knowledge and a basic understanding of the fundamental economic issues and mechanisms. At the end of this course, the student will be able to explain why the inhabitants of certain countries benefit from better living conditions than others; to understand how a market economy works, to understand its advantages and disadvantages, and to identify the role that the state can play in it; and develop an argument based on empirical and theoretical elements to evaluate public policies (implemented or likely to be). The course focuses on an intuitive understanding of theory through applications to major societal challenges and an analysis of current debates. Students will learn to put into perspective the notions developed during the exercise sessions and with the help of additional reading.</p>
