works, materials, personalities and crises that have animated this dense period of social, political and eco transformation. Learning outcomes At the end of this learning unit, the student is able to : The History of Architecture teaching unit is designed to provide a set of references. It will however a considering history as merely a reservoir of examples, but attempt to analyse it 'historically', i.e. to these examples in their context to gain better understanding of their deep meaning. The main objective of the unit is to examine and (attempt to) understand architecture as a com phenomenon, at the same time intellectual, physical and social in nature and what it means, taki strictly historical approach. Specific learning outcomes: By the end of this course, students will be able to • be familiar with the relative chronology and the link between the successive contributions of s major designers. • analyse the products and 'theories' which have grown in number since the Renaissance. • analyse products as a reflection of ideology and power. Contribution to the learning outcomes reference network: Build knowledge of architecture • Be familiar with and analyse the discipline's basic references • Be able to use given references which, by analogy, can lead to other interpretations of the conte • Develop knowledge and become an active participant in the learning process Place the action • Identify and analyse the paradigms on which the study is based according to various given met and starting from various points of view • Formulate questions relating to the development of the context being studied to make wo hypotheses Make use of other subjects • Make strategic use of other subjects to put into question the design and implementation c architectural project	Teacher(s)	Lampariello Beatrice ;					
Main themes The course focuses on the last forty years of architecture. Its study is conducted through the debates, e works, materials, personalities and crises that have animated this dense period of social, political and eco transformation. Learning outcomes At the end of this learning unit, the student is able to : The History of Architecture teaching unit is designed to provide a set of references.
