Q2

Teacher(s)	Hance Thierry ;Wesselingh Renate ;
Language :	French
Place of the course	Louvain-la-Neuve
Learning outcomes	
Evaluation methods	<p>Presentation of a synthesis work in the form of an oral presentation.</p> <p>The evaluation will focus on the group work, the methodology used, the quality of the hypotheses, the data collection, the analysis of the results and their discussion.</p>
Teaching methods	One week field course with overnight stays, usually outside Belgium.
Content	<p>The objective of the terrestrial ecology internship is to develop an experimental methodology in the field based on a hypothesis put forward by the students themselves.</p> <p>In one week, in groups, students develop a protocol to test their hypothesis, collect data, analyze it and produce a synthesis in the form of an oral presentation. The subjects potentially address all fields of ecology with an evolutionary approach.</p>
Other infos	A financial contribution is requested.
Faculty or entity in charge	BIOL
