2024

4.00 credits

lbrte2201

30.0 h + 7.5 h

Q1

Human and environmental toxicology

| Teacher(s) | Debier Cathy ; | | | | |
|---------------------|---|--|--|--|--|
| Language : | English > French-friendly | | | | |
| Place of the course | Louvain-la-Neuve | | | | |
| Prerequisites | Basics of chemistry, biochemistry and physiology | | | | |
| Main themes | Human Toxicology (30h): Historical Overview, concepts and basic concepts in toxicology, assessment methods - Metabolism of xenobiotics : absorption by inhalation, ingestion or dermal; distribution; biotransformation (phase I and II reactions) and excretion - Toxicity of major pollutants or contaminants dangerous to humans: lead, cadmium, mercury, pesticides, dioxins, PCBs, air pollutants, carcinogens - Risk assessment. Environmental Toxicology (15h +7.5 h): Transport of pollutants - Monitoring of pollutants (biomarkers and bioindicators) - Emerging Pollutants - Contamination of foodstuffs - Endocrine Disruptors - Effects of pollutants on populations and communities - Risk assessment in ecotoxicology Depending on their program, students may attend only the "Human Toxicology" (BRTE2201A) | | | | |
| Learning outcomes | At the end of this learning unit, the student is able to : | | | | |
| | a. Contribution of the activity to the referential of the programme (LO) 1.1, 1.2, 2.2, 2.5, 6.1, 6.2, 6.4, 7.1, 7.3, 7.4, 8.1, 8.4, 8.5, 8.6 b. Specific formulation of the learning outcome of this activity. At the end of this course, the student: knows and understands the basic principles of toxicology (dose, exposure, hazard, danger, indicator, biomarker); is able to describe the epidemiological and experimental methods used to assess the toxicity of chemicals; knows the main routes of absorption, metabolism and elimination of toxic substances; is able to compare the toxicity of major pollutants and contaminants to which humans may be exposed according to their lifestyle (heavy metals, air pollutants, pesticides, dioxins, industrial pollutants, hydrocarbons ') 1 After the section " Environmental Toxicology ", the student : knows and understands the impact of pollutants on individuals (including humans), communities and ecosystems (among others through the use of biomarkers); masters the techniques of " risk assessment " in ecotoxicology; understands the specificities related to the toxicity of endocrine disruptors and is able to make comparisons with other toxic substances; knows emerging pollutants, including their toxic effects, and is able to compare it with older pollutants; demonstrates critical thinking towards the impact of human activities on environmental contamination and ultimately on human health. | | | | |
| Evaluation methods | Written exam during the session (questions on theory and exercices) | | | | |
| Teaching methods | Coordinated package of lectures with audio-visual aids (slides and videos) given by the teachers - concrete examples Exercices on risk assessment in ecotoxicology and seminars given by invited experts Most of the activity requires the presence of the students. | | | | |
| Content | The course is divided in different chapters : 1 - Principles of Toxicology - Introduction to toxicology - Characteristics of exposure - Interactions of chemicals - Dose-response | | | | |

Université catholique de Louvain - Human and environmental toxicology - en-cours-2024-lbrte2201

| | Variation in toxic responses 2 – Absorption, Distribution, biotransformation and Excretion of toxicants 3 - Persistent organic pollutants 4 – Heavy metals 5 - Pesticides 6 - Plastics and microplastics 7 - Endocrine disruptors 8 - Environmental Toxicology Transport and fate of toxicants in the environment Environmental monitoring Environmental risk assessment The practical section includes seminars given by experts and exercises on risk assessment in ecotoxicology |
|-----------------------------|--|
| Inline resources | Moodle |
| Bibliography | Slides used by the professors are available on Moodle |
| Other infos | This course can be given in English. |
| Faculty or entity in charge | AGRO |
