## UCLouvainIchm1371vMetabolic biochemistry - courses and<br/>bibliographic work

4.00 credits

30.0 h + 15.0 h

Q2

Teacher(s)	Page Melissa ;				
Language :	English				
Place of the course	Louvain-la-Neuve				
Prerequisites	Advised knowledge of the concepts covered in the following teaching units is strongly recommended: LBIO111 LCHM1141A				
Main themes	Main themes to cover :         1. Introduction to metabolism         2. Bioenergetics         3. Biochemical transport phenomenon         Main metabolic ways :         1. Glycolysis and hexose catabolism         2. Metabolism of glycogen and glyconeogenesis         3. Oxidation of fatty acids and biosynthesis of lipids         4. Krebs cycle         5. Electron transport, oxidative phosphorylation         6. Metabolism of amino acids, nucleotides and linked molecules.         Main ways of regulation.         The exercises are divided into two complementary parts :         One, followed in the case of CHIM BAC, consists of practical work on a specific question in biochemistry.         The other, for all, consists of preparing, presenting and discussing, in groups, a question linked to a biochemical				
Learning outcomes	problem, but voluntarily carrying onto other disciplines of life sciences.				
Evaluation methods	<ul> <li>For all students (chemists, biologists and veterinarians), evaluation includes :         <ol> <li>A written exam that will take place during the June exam session. The exam can include questions requiring precise / short answers, theoretical developments or problem solving. Exam questions are presented in both French and English. Answers in either language are eqaully accepted and there is no preference for one language over the other.</li> <li>Group work, which can include a group presentation. The evaluation for the group will take place during the normal class hours. Group work can be prepared in French or English.</li> </ol> </li> <li>For chemistry and biology students evaluation includes :         <ol> <li>A lab report following the participation and completion of laboratory sessions. The evaluation will take place during the participation and completion of laboratory sessions.</li> </ol> </li> </ul>				
Teaching methods	during the normal term. The lab report can also be prepared in French or English.         The skills targeted by the course will be developed using lectures.         Laboratory sessions are for chemistry and biology students, and not for students in veterinary science.         Group projects are mandatory for all.				
Content	Please look to LCHM1371 for all the information concerning this course.				
Inline resources	Slideshows are available via the moodle platform based on current literature and the two textbooks listed (thes are not required by the students)				
Bibliography	Lehninger Principles of biochemistry 7th edition     Voet & Voet Biochemistry 4th Edition Le cours ne fait appel à aucun support particulier qui serait payant et jugé obligatoire. Les manuels ci-dessus so recommandés (mais pas obligatoires) sur une base facultative pour un apprentissage plus approfondi				
Faculty or entity in charge	СНІМ
