Economic Analysis Seminar II - UCLouvain

Teacher(s)	Vandenberghe Vincent ;			
Language :	English			
Place of the course	Louvain-la-Neuve			
Main themes	The teacher proposes an issue to be addressed by the students (for example, is the Walloon Marshall Plan effective?). Students - identify the theoretical elements that address the issue. They identify the logic that guides the economic question; - They identify empirical methods that would answer the question; - They collect data relevant to the empirical analysis; - They perform the empirical analysis; - They interpret the results and explain the problems and the underlying statistical limits.			
Learning outcomes	At the end of this learning unit, the student is able to: At the end of the activity, students will be able - to synthesize the elements that are essential to the understanding of a generic economic problem, - to collect, select and analyze relevant data and information using rigorous and state-of-the-art methods - to express a message in a clear, concise and structured way, both orally and in writing, - to manage their work: set priorities, anticipate and plan all the relevant steps, - to work in team.			
Evaluation methods	The evaluation is based onthe quality of intermediate and final written work, on the quality of oral presentations and on the discussion about the work of the other students.			
Teaching methods	Students work in small groups. They write minutes, discuss presentations, write progress reports and present these reports orally			
Content	The topic may change each year, according to the economic questions of the moment. Students identify the theoretical elements that address the issue. They identify the logic that guides the economic question. They identify empirical methods that would answer the question. They collect data relevant to the empirical analysis. They perform the empirical analysis. They interpret the results and explain the problems and the underlying statistical limits.			
Bibliography	En fonction du thème étudié.
