Language :	French
Place of the course	Louvain-la-Neuve
Learning outcomes	
Evaluation methods	<ul style="list-style-type: none"> • Assessment is based on an individual written examination. • Passing this exam is essential to demonstrate the skills and knowledge defined in the learning outcomes of the teaching unit. • Assessment procedures will be identical in the first and second sessions. • The use of generative Artificial Intelligence tools (e.g., Chat GPT, etc.) is forbidden for all productions (e.g., assignments, documents to be completed, etc.) required of students as part of this teaching unit.
Teaching methods	The course is organized in 5 lecture sessions and 3 practical sessions (guidance and feedback sessions), structured around a few key themes. The course sessions are based on lectures and interactive moments (exercises, discussions) organized in such a way that the students mobilize and appropriate the concepts and tools presented in the course. Theoretical lectures alternate with practical exercises throughout the course. This practical application allows students to use the methodologies, to learn how to design a qualitative study, to conduct interviews, to code data and to ensure a theoretical reflection. The practical sessions are designed to allow students to verify their understanding of the methodological principles and tools presented during the course sessions.
Content	The objective of this course is to introduce students to the qualitative research process, focusing on the steps that follow the construction of a problem statement and the formulation of a research question: the steps of designing a qualitative research project, the collection and analysis of qualitative data. The aim is to train students in the epistemological and methodological principles of qualitative research, the main strategies for collecting and analyzing qualitative data, and the main issues related to the validation of qualitative material. This teaching unit consists in offering students an overview of the different qualitative research methods as well as the opportunity to experiment with one of them: the semi-structured interview.
Inline resources	<p>On Moodle, you will find bibliographic references and other documents that support the course, as well as up-to-date practical information about the course.</p> <p>Regular monitoring of the Moodle site is essential. It will contain all the useful instructions concerning participation in the sessions, the pedagogical methods and the evaluation methods.</p>
Bibliography	Les étudiant.es disposent d'un portefeuille de lecture (sur Moodle).
Other infos	<p>This course is given in an "English-friendly" format. For details, please see below.</p> <p>The course is given in French, but a set of English slides is available for international students:</p> <ul style="list-style-type: none"> • no <p>The core reading for the course is in French, but equivalent core reading is available for international students in English</p> <ul style="list-style-type: none"> • yes <p>The course requires coursework in French. However, international students taking this course:</p> <ul style="list-style-type: none"> • Can provide the coursework in English: <ul style="list-style-type: none"> yes • Can be exempt from providing the coursework: <ul style="list-style-type: none"> no
