Company Internship

10.00 credits	30.0 h	Q1 and Q2
---------------	--------	-----------

Teacher(s)	Lederer Dimitri ;Raskin Jean-Pierre ;			
Language :	French			
Place of the course	Louvain-la-Neuve			
Main themes	This can be done in several ways such as an investment or a R&D project, a supervision of a building site, an improvement project for a production process or a project focused on maintenance of quality, logistics, security or management'			
Learning outcomes	At the end of this learning unit, the student is able to :			
3	The internship must necessarily contribute to a specific project within the company.			
Evaluation methods	Students are evaluated by the academic supervisor according to - the internship report, in particular the critical assessment of the student on his/her skills in an industrial environment - the qualitative assessment by the industrial internship supervisor of the trainee's motivation and contribution, as			
	well of the technical report and deliverables - the oral presentation with the academic supervisor (presentation of slides and discussion)			
Teaching methods	Internships can take place in: a production or service company, an industrial research center located in Belgium or abroad. An "internship market" with offers gathered by the Internships Coordination Office is accessible for students on the EPL virtual office (see "how to find a job" sub section). Naturally, the option for students to use thier personal contacts network can always be useful and efficient.			
Content	The main objective of the internship is to be able to contribute to a concrete project within the company. This can be done in several ways such as investment or R&D project, supervision of a construction site, improvement project for a production process, project focused on a quality maintenance, logistics, security, management issue, etc.
