Drawing 4: Presentation and presentation techniques [45h]

3.00 credits

45.0 h

Q2

Teacher(s)	Andrieux Frédéric ;			
Language :	French			
Place of the course	Louvain-la-Neuve			
Main themes	Drawing as a tool for analysis and investigation, expression and communication: Parallel work in manual and computer-aided techniques. Intensive study of architectural drawing as a means of exploration and development of design, through repetitive practice of sketching and sketch design. Intensive study of software and presentation through progressive scaling of a particular design project (different viewpoints, 3D modelling, etc.). Understanding the difference between "finished" and "complete" drawings in the context of design practice, from design to construction. Exercises in project publication, photomontage, inclusion of text.			
Learning outcomes	At the end of this learning unit, the student is able to : By the end of this course, students will be able to: Use drawing as a support for expression, analysis and communication. Develop a sense of representation in manual and computer-aided design as regards shadows, light and colors, materials.
