Q2

Teacher(s)	Lambert Didier ;Lorent Joseph ;
Language :	French > English-friendly
Place of the course	Bruxelles Woluwe
Prerequisites	<i>The prerequisite(s) for this Teaching Unit (Unité d'enseignement – UE) for the programmes/courses that offer this Teaching Unit are specified at the end of this sheet.</i>
Main themes	Bibliographical review and critical evaluation of literature collected on chosen medicinal plants: composition, active molecules (known or potential), critical evaluation of activities in relation with their composition and pharmacological tests described, proposition of a quality control method.
Learning outcomes	<p><b>At the end of this learning unit, the student is able to :</b></p> <p>1 After this course, students should be able to apply data given in the pharmacognosy course to perform a critical scientific and non scientific bibliographical review on medicinal plants. The aim is to help the student to take an appropriate position on this literature, particularly on active molecules and given indications. They should also be able to propose at least theoretically a quality control monograph.</p>
Evaluation methods	Continuous evaluation on the basis of work to be carried out (oral presentation)
Teaching methods	personal or group critical work
Content	On the basis of a literature review, the student, alone or in small groups, will perform a critical study of a document on a medicinal plant and will propose a monograph to control its quality. A written document should be prepared and will be discussed with the teacher.
Inline resources	on Moodle platform
Faculty or entity in charge	FARM
