Q1 and Q2

Teacher(s)	Dessy Chantal ;Feron Olivier ;Hermans Emmanuel ;Rocour Muriel ;Spinewine Anne ;Van Bambeke Françoise (coordinator) ;
Language :	French > English-friendly
Place of the course	Bruxelles Woluwe
Main themes	The seminar will examine clinical situations based on practical examples with frequent pathologies seen mainly out of the hospital, for example, hypertension and the prevention of cardiovascular diseases, diabetes and related complications, osteoporosis and menopauses, sleeping disorders, Parkinson disease, respiratory pathologies (astme, BPCO), reflux, constipation, diarrhea, acute or chronic pain, allergies, 'For each topic, the role of the pharmacist will be discussed for optimizing the efficacy and safety of the treatment.
Learning outcomes	<p><b>At the end of this learning unit, the student is able to :</b></p> <p>The objective is to give to the future pharmacist the opportunity of learning the use of drugs in practical clinical situations. The teaching approach is oriented to help the students acquiring competences in the field of pharmaceutical care. At the end of the seminar, the students should be able</p> <ul style="list-style-type: none"> <li>• to understand the main indications and the rational use of drugs for a given patient,</li> <li>• to understand the role of each specific medication in the treatment of this patient as well as the global (pharmacological and non-pharmacological) treatment of the patient. and replace the</li> <li>• to understand the nature of the pharmacological effects and how to obtain them</li> <li>• to evaluate undesirable effect, detect and manage drug interactions</li> <li>• to evaluate the adequacy of the posology</li> <li>• to give appropriate advice to the patient and to discuss about the appropriate usage of drugs with other health professionals</li> </ul>
Evaluation methods	evaluation during the year (seminar: tests + clinical case) + exam at the end of the year (written part: clinical case, multiple choices ; oral : open questions)
Teaching methods	lectures (on pharmacotherapy principles) and small groups seminars (practical courses)
Content	Selected topics are analyzed on an interactive way, taking into account therapeutic recommendations. The students will learn how to establish pharmaceutical care plans, to discuss with healthcare providers and patients, to analyze reasons for therapeutic failure and pharmacotherapeutic problems, and to use pertinent information sources. Role-playing games will be used to reach these objectives starting from concrete situations. Seminars are organized for small groups of students. Pharmacists are participating to the supervision of the exercises.
Other infos	Participation in the practical work, tutorials and exercise sessions is compulsory and essential to validate the teaching unit. Any unjustified absence will result in a penalty for the exam, which can go as far as the cancellation of the exam mark (0/20). In case of repeated absences, even if justified, the teacher may propose to the jury to oppose the registration for the EU exam in accordance with article 72 of the RGEE.
