Teaching methods	Exercises Active participation highly recommended.
Content	The course requires students to build up their vocabulary using a thematic approach. Q 1 updates student's lexical knowledge, with Q 2 focusing in widening students' lexical repertoire. Students are given a range of German language texts that they study - in depth - both with regard to form and content with a view to translating them into French. In parallel and in a supportive complementary manner, similar themes are studied during the classes that are devoted to: lexicology, text analysis and introduction to translation.
