larcb1111	Architectural Design Studio 1:
2025	Initiation

The version you're consulting is not final. This course description may change. The final version will be published on 1st June.

20.00 credits	240.0 h	Q1 and Q2

Language :	French
Place of the course	Bruxelles Saint-Gilles
Main themes	The training offered in the Architectural Project 1 studio is designed to enable students to acquire basic elements in the understanding and practice of the architectural project by doing a series of project assignments with specific objectives. Skills are acquired through the practice of architecture project facing the complexity of the following topics: • **Scales** from domestic elements to the territory, • **Contexts** built and unbuilt, cultural, historic, and environmental, • **Types and Typologies** in architecture, • **Structures and Materials** in architectural space.
Learning outcomes	**At the end of this learning unit, the student is able to :** By the end of this course, students will be able to design an architectural project in response to a contextualized question, integrating issues of sustainability. Students will be able to: • Analyze a given situation, identify its challenges, and articulate architectural intentions by taking a clear stance, • Develop an architectural project with coherence, sensitivity, and an understanding of the fundamental and enduring values of the discipline, • Communicate and present the architectural project through oral argumentation, models, and drawings, while mastering coded representations, orthogonal projections, sketch diagrams, and freehand sketches. Architectural Design Studio 1 aims to achieve these general objectives in an introductory manner. ## General Learning Outcomes In line with the program's learning outcomes (LOs), this course contributes to the development and acquisition of the following LOs: • LO1.1 Identify the parameters and issues of a given situation. • LO1.2 State the intentions and choices of an architectural project at different intervention scales. • LO1.3 Design spaces conducive to the well-being of both human and non-human occupants. • LO1.5 Creatively compose a project. • LO2.1 Acquire and proficiently apply the conventions of representation in two and three dimensions. • LO2.2 Proficiently depict an architectural concept. • LO2.3 Proficiently portray spatial experiences. • LO3.1 Acquire and explain the physical and physiological principles related to architecture. • LO5.2 Organize individual or collective work attentively and inclusively.
Faculty or entity in charge	LOCI
