

The version you're consulting is not final. This course description may change. The final version will be published on 1st June.

5.00 credits

30.0 h

Q2

Language :	English
Place of the course	Louvain-la-Neuve
Prerequisites	Solid knowledge of econometrics at the theoretical and practical level. The course Advanced Econometrics I of the Research Master corresponds to the prerequisite.
Main themes	The themes are taken in time series econometrics, financial econometrics and microeconometrics. There is a mix of theoretical and applied econometrics.
Learning outcomes	<p>At the end of this learning unit, the student is able to :</p> <p>1 The seminar aims at acquainting students with the current topics at the frontier of research in econometrics.</p>
Evaluation methods	The evaluation will consist of analyzing a real database using one of the proposals discussed in the seminar; students are expected to generate a draft paper; the main conclusions will be discussed with each student in person during the June exam session.
Teaching methods	Each lecture will focus on a specific empirical research problem: the anatomy of the identification problem will be made explicit and its solution using partial identification tools will be discussed.
Content	Identification problems due to different missing data patterns; identification problems due to contaminated or measured with error data; identification problems in political sciences, particularly presidential election; identification problems due to extrapolation of randomized control trials; identification problems due to evaluation of public policies.
Bibliography	A syllabus will be provided at the beginning of the course.
Faculty or entity in charge	ECON
