

The version you're consulting is not final. This course description may change. The final version will be published on 1st June.

5.00 credits	15.0 h	Q2
--------------	--------	----

Language :	English
Place of the course	Louvain-la-Neuve
Learning outcomes	
Evaluation methods	The structure of evaluations may change according to the health situation, but will likely consist of oral presentations and a written project.
Teaching methods	Seminar-based discussions of frontier research. Papers to be discussed will be assigned ahead of time.
Content	<p>Experimental Economics</p> <p>Experiments are increasingly ubiquitous in economics — in the lab, in the field, on the internet, in government. This seminar will focus on the design of experiments and the interpretation of the data that they produce. The discussions will pay particular attention to the role experiments play in advancing theory, and the different econometric framing that may be desirable when researchers design their own data generating processes.</p>
Inline resources	Slides, homeworks, exercises, compulsory readings will be available on the course webpage on Moodle UCL ( <a href="http://moodleucl.uclouvain.be/">http://moodleucl.uclouvain.be/</a> ).
Faculty or entity in charge	ECON
