4.00 credits

30.0 h

Q1

Teacher(s)	De Jaeger Dominique (coordinator) ;Patris Sophie ;
Language :	French
Place of the course	Louvain-la-Neuve
Main themes	The following topics will be studied: the scientific method, assessing the scientific literature online, critical review of the literature, scientific writing.
Learning outcomes	<p>At the end of this learning unit, the student is able to :</p> <p>1 At the end of the course the successful student will be able to understand how science works, to conduct research into databases that cover movement sciences topics (ex : Pubmed, Scopus), to find and assess scientific literature and to apply this knowledge to the preparation of a thesis in physical education field.</p>
Evaluation methods	<p>In this course, students are assessed in three ways:</p> <ul style="list-style-type: none"> • Continuous assessment, including the submission of assignments and participation in online activities on Moodle (10% of the final grade). Students must complete 80% of the assignments and activities proposed on Moodle to pass this part of the assessment. • A quiz on bibliographic database research organized during the course (30% of the final grade). • A written examination organized during the course (60% of the final grade). <p>In the second session, the assessment of work submission and participation in Moodle activities acquired in the first session is maintained, and still represents 10% of the final grade. The remaining 90% is assessed by written examination.</p>
Teaching methods	<p>Theoretical course in lecture halls and in computer rooms.</p> <p>Theoretical concepts are illustrated through examples in scientific publications.</p>
Content	<p>1) The scientific method: theoretical concepts are taught and illustrated through presentations made by professors and assistants working in various fields of movement sciences research.</p> <p>2) Literature search and use of bibliographic databases in motor sciences : theoretical concepts and computer exercises on Pubmed and Scopus databases. This module is taught with the collaboration of the librarian.</p> <p>3) Critical review of the literature and scientific writing: what distinguishes scientific literature from non-scientific literature? How are bibliographic references presented?</p>
