Individual final project

The version you're consulting is not final. This course description may change. The final version will be published on 1st June.

15.00 credits		Q1 and Q2

This learning unit is not open to incoming exchange students!

Language :	French
Place of the course	Louvain-la-Neuve
Main themes	The dissertation (maximum of 215,000 characters, including spaces) should develop a hypothesis in a precise, clear and well-documented way, with the agreement of a supervisor.
Learning outcomes	**At the end of this learning unit, the student is able to :** By completing a individual final project, students will demonstrate their ability to develop a philosophical hypothesis which is well documented and argued. In particular, they will demonstrate their ability to: 1) develop a philosophical topic and deal with it in an informed and coherent way. 2) make appropriate use of research tools by meeting prevailing academic criteria. 3) formulate a hypothesis and set out the underlying argument coherently, clearly and in a well-structured way.
Evaluation methods	Written work is assessed by the supervisor and two readers. Students are required to respond to questions put to them by their supervisor and two readers at an oral defense. Generative artificial intelligence (AI) must be used responsibly and in accordance with the practices of academic and scientific integrity. As scientific integrity requires that sources be cited, the use of AI must always be reported. The use of artificial intelligence for tasks where it is explicitly forbidden will be treated as a case of irregularity or plagiarism.
Other infos	Guidelines on writing the individual final project are available at http://www.uclouvain.be/81186.html
Faculty or entity in charge	EFIL
