Biologie cellulaire et éléments d'histologie (partim A FSA)

The version you're consulting is not final. This course description may change. The final version will be published on 1st June.

4.00 credits	45.0 h	Q2

Language :	French
Place of the course	Louvain-la-Neuve
Main themes	• Characteristics common to all living beings • The human cell, its functioning and its division • Classical, evolutionary and molecular genetics • The cellular bases of sexual reproduction • The different cell types and their organization into tissues (epithelia, connective tissues, blood tissue, muscle tissue, nervous tissue) • The main stages of human embryonic development.
Learning outcomes	
Evaluation methods	Assessment: 2-hour written exam. The distribution between the two parts of the course is as follows: 10 points for biology (P. Henriet part) and 10 points for histology (C. Behets part).
Teaching methods	Lectures, for a large audience
Content	(auteurs - titulaires actuels) : P. Henriet and C. Behets Wydemans **Biology (P. Henriet)**: 1. UNICITY IN THE LIVING WORLD 2. THE HUMAN CELL 3. DIVERSITY IN THE LIVING WORLD 4. MOLECULAR GENETICS 5. CELL DIVISION 6. GAMETOGENESIS AND FERTILIZATION 7. INTRODUCTION TO HUMAN EMBRYOLOGY **Histology (C. Behets Wydemans)**: 1. EPITHELIAL TISSUE 2. CONNECTIVE TISSUE 3. BLOOD TISSUE 4. MUSCLE TISSUE 5. NERVE TISSUE 2.6.0.0
Other infos	The Biology part is based on the LFSM1101 General Chemistry and Biomolecules course. Course materials: Syllabus and Powerpoints projected during classes. This course is reserved for FSM students. Its access is possible to other UCLouvain students on the basis of a file to be given to the course coordinator.
Faculty or entity in charge	FSM
