

5.00 credits

45.0 h + 22.5 h

Q2

This biannual learning is being organized in 2025-2026

Teacher(s)	Meunier Nicolas ;
Language :	French
Place of the course	Louvain-la-Neuve
Prerequisites	LGLOR1331 et LGLOR1332, or equivalent level
Main themes	In-depth study of specific issues in synchronic or diachronic linguistics of Latin, with particular attention to Imperial and Late Latin.
Learning outcomes	<p>At the end of this learning unit, the student is able to :</p> <ol style="list-style-type: none"> 1 develop a linguistic reflection on questions and issues related to the Latin language; 2 identify, explain and illustrate different stages of evolution of the Latin language.
Evaluation methods	<p>The evaluation of the learning outcomes will take place as follows:</p> <ul style="list-style-type: none"> - Practical sessions (including metric exercises and steady versions), which will be worth one fifth of the final grade (4/20). In case of failure in this part, a complementary test (version) will have to be presented at the September session. - Written test of theoretical knowledge and practical skills acquired during the course. This test will be worth two fifths of the final mark (8/20). It will take place in the June session. In case of failure, the remedial test will be held at the September session under the same conditions. - Oral test to check mastery of cursive reading. This test will be worth two fifths of the final mark (8/20). It will take place in the June session. In case of failure, the remedial test will be held at the September session under the same conditions. <p>Generative artificial intelligence (AI) must be used responsibly and in accordance with the practices of academic and scientific integrity. Scientific integrity requires that sources be cited, and the use of AI must always be reported. The use of artificial intelligence for tasks where it is explicitly forbidden will be considered as cheating.</p>
Teaching methods	Alternating interactive class sessions and practical work.
Content	<p>This Master's specialisation seminar will consist of two modules.</p> <p>The first one (30h) will deal with the following topics:</p> <ul style="list-style-type: none"> • The Latin metric (deep rules of the hexameter, as well as characteristics of the iambo-trochaic and aeolic verses). • Selected chapters of questions of Latin linguistics, intended to illustrate the evolutions of Latin in the post-classical period (imperial and late Latin). <p>The second module (15 hours) will consist of a commented reading of a work of pre-classical language (in this case significant extracts from Tacitus' work).</p> <p>At the same time, students will read a long Latin text independently (cursive reading). This year it will be significant extracts from Seneca's <i>Letters to Lucilius</i>.</p>
