UCLouvain linfo2399 Industrial seminar in computer science

The version you're consulting is not final. This course description may change. The final version will be published on 1st June.

30.0 h

3.00 credits

Q2

| Teacher(s)                  | Deville Yves ;Geubelle Bernard ;   |  |  |  |  |
|-----------------------------|--|--|--|--|--|
| Language :                  | English<br>> French-friendly   |  |  |  |  |
| Place of the course         | Louvain-la-Neuve   |  |  |  |  |
| Main themes                 | The objective of this seminar is to enable students to gain a clearer view of their future professional career.<br>To achieve this, professionals will present industrial applications related to new technology, share experiences,<br>present difficulties and discuss their choices.<br>The technical themes will vary from year to year.   |  |  |  |  |
| Learning outcomes           | At the end of this learning unit, the student is able to :   |  |  |  |  |
|                             | Given the learning outcomes of the "Master in Computer Science and Engineering" program, this course contributes to the development, acquisition and evaluation of the following learning outcomes:  |  |  |  |  |
|                             | • INFO6  |  |  |  |  |
|                             | Given the learning outcomes of the "Master [120] in Computer Science" program, this course contributes to the development, acquisition and evaluation of the following learning outcomes:  |  |  |  |  |
|                             | 1 • SINF6  |  |  |  |  |
|                             | Student completing successfully this course will be able to  |  |  |  |  |
|                             | <ul> <li>explain the challenges and difficulties of implementing IT projects in the professional world;</li> <li>argue about the differences between the academic and industrial visions of computing;</li> <li>list different types of careers in the IT world;</li> <li>position themselves in relation to the professional IT world;</li> <li>make choices to manage his future career.</li> </ul>  |  |  |  |  |
| Evaluation methods          | <ul> <li>In this seminar, student participation is essential and required.</li> <li>Failure to attend two or three seminars will require the student to complete a personal assignment.</li> <li>Failure to attend more than three seminars will result in failure, which cannot be redone at the August session.</li> <li>For two or three of the seminars attended, students will be required to produce a personnal summary paper, which will be assessed. This assessment could take the form of a peer assessment.</li> <li>The final grade will be made up of the grades of the different works done.</li> </ul> |  |  |  |  |
| Teaching methods            | This seminar is organized as a set of talks given by professional in different domains of computer science.  |  |  |  |  |
| Content                     | The objective of this industrial seminar is to give a positive view of the future professional carrier of the students. Different professionals will present real applications and experiences in new technological topics, their contributions and issues.  |  |  |  |  |
