

The version you're consulting is not final. This course description may change. The final version will be published on 1st June.

4.00 credits	30.0 h	Q2
--------------	--------	----

Teacher(s)	Crollen Virginie ;Van Reybroeck Marie ;
Language :	French
Place of the course	Louvain-la-Neuve
Learning outcomes	
Evaluation methods	The course evaluation will consist in an oral presentation of one or two pieces of research by the students, including the presentation of the advantages and the limitations of the piece of research. The students will be informed since the beginning of the course of this procedure.
Teaching methods	The course is based on presentations of scientific pieces of research and pieces of research applied to speech and language therapy that are going to be critically analysed during interactive activities with students. Secondly, students will be called upon to present a piece of research (theoretical framework, research questions, method, results, discussion and conclusion), and to present their advantages and limitations for the understanding of given situations.
Content	The course aims to develop ability to stand back regarding the advantages and the limitations of research in speech and language clinical therapy. It addresses different formats of scientific communication in order to acquire relevant skills in research communication.
