Macroéconomie et politique économique

8.00 credits	45.0 h + 12.0 h	Q2

This learning unit is not open to incoming exchange students!

Teacher(s)	Dejardin Marcus ;Perilleux Anaïs ;Simar Luc ;
Language :	French
Place of the course	Louvain-la-Neuve
Main themes	In a first stage, the main subject to be tackled is that of the structuring of the economic circuit in the framework of the national accounting in an open economy, stressing both the links between the three traidtional axes (production, distribution of income, and expenses) and between the different economic agents (accounts of economic units). The final objective is to develop a global double entry economic table (by economic operation, by macro-économic agent). In a second stage, the objective is to tackle the macro-économic analysis in a dynamic perspective and no more from a static point of view. This will be achieved through a study of the interactions between the agents'macro-economic behaviours(supply and/or demand behaviour, pricing behaviour, ...) and certain structural characteristics ot he economies under review (partial unbalances incertain markets, productions structures in a two-sector economy, ...).
