

The version you're consulting is not final. This course description may change. The final version will be published on 1st June.

5.00 credits

25.0 h + 15.0 h

Q1

Language :	French
Place of the course	Bruxelles Woluwe
Prerequisites	<i>The prerequisite(s) for this Teaching Unit (Unité d'enseignement – UE) for the programmes/courses that offer this Teaching Unit are specified at the end of this sheet.</i>
Learning outcomes	
Evaluation methods	<ol style="list-style-type: none"> 1. A written exam on the course (50%), lasting 2 hours. 2. Participation in the course and evaluation of the practical work, and the required readings (50%).
Teaching methods	<p>The course facilitates the links between theory and practice. Some sessions are based on a case study prepared by the students: watching a video or reading a paper.</p> <p>Practical exercise (PE)</p> <p>Students will conduct a group policy analysis of a health problem and its solutions in order to develop useful recommendations for policy makers. Students will be asked to analyze a topic. Each group will take up an issue (see list on moodle). They analyze the issue with the theoretical frameworks of the course and try to compare the Belgian situation to other EU countries. An evaluation grid for the work is available on moodle. In 2021-22, the TP will focus on the issues of covid19 immunization.</p>
Content	<ol style="list-style-type: none"> 1. Health policy concepts. 2. The health policy agenda 3. Political determinants of health problems 4. The actors of a health problem 5. The implementation of health policies; 6. The Belgian health and health care policy system in a comparative perspective 7. Health policy, research and health decision making: the links between research and policy
