

The version you're consulting is not final. This course description may change. The final version will be published on 1st June.

9.00 credits

Q2

Language :	French > English-friendly
Place of the course	Bruxelles Woluwe
Learning outcomes	
Evaluation methods	Knowledge of the research project and the fields in biomedical sciences it covers will be assessed, on the basis of a scientific report written by the student (pre-thesis) and an oral defense.
Teaching methods	For this activity the student will be guided by the promoter of the laboratory internship (WSBIM2197).
Content	At the end of his first laboratory research internship (WSBIM2197), the student will write a scientific report (pre-thesis) describing the context of the research project, its objectives, the experimental approach envisaged, and preliminary results. He will ensure that links are established between his research project and the current knowledge in the concerned field(s) of biomedical sciences.
Other infos	Access to this professional integration activity is subject to conditions (see regulations of the School of Biomedical Sciences).
Faculty or entity in charge	SBIM
