

The version you're consulting is not final. This course description may change. The final version will be published on 1st June.

3.00 credits	30.0 h	Q2
--------------	--------	----

Teacher(s)	Andrade Amorim Christiani ;Bertrand Luc ;Dessy Chantal ;Dumoutier Laure ;Froidure Antoine ;Hanseeuw Bernard ;Henriet Patrick ;Horman Sandrine ;Jonas Jean-Christophe (coordinator) ;Kautbally Shakeel ;Maggi Pietro ;
Language :	English
Place of the course	Bruxelles Woluwe
Learning outcomes	
Evaluation methods	The practical details for poster delivery and presentation will be explained at the initial meeting. Evaluation will be based on the scientific content and form of the poster (structure, clarity, legibility) and on the quality of the presentation and answers to questions.
Teaching methods	Groups of 2 to 3 students will work on a topic proposed by one of the 10 professors and prepare a poster to be presented for the evaluation. The practical details (topic attribution, number of groups per teacher, poster format...) will be explained during an initial meeting.
Content	Building on scientific knowledge acquired during her-his cursus in biomedical sciences, students will independently explore a specific topic in pathophysiology of non communicable human diseases through the search and critical analysis of research papers under the guidance of one of the teachers in charge. They will also learn to communicate their findings through the preparation, presentation and discussion of a poster.
Other infos	The poster and presentation should be in English.
Faculty or entity in charge	SBIM
