Main themes	<p>The Architectural Design Studio 2 explores various aspects of architectural composition through a series of project assignments with targeted objectives, supported by appropriate references. The themes addressed are defined by a program and an environmental context:</p> <ul style="list-style-type: none"> • Dwelling in its broadest sense (domestic, collective, urban, territorial). • The built environment, at a neighborhood scale, on defined plots, and in relation to existing buildings, incorporating the constituent dimensions of architectural space: structure, light, and materials. <p>As part of the learning process for architectural composition, the Architectural Design Studio 2 integrates these themes into the progressive acquisition of design skills.</p>
