Q2

Teacher(s)	Lefebvre Arthur ;
Language :	French
Place of the course	Louvain-la-Neuve
Main themes	<ul style="list-style-type: none"> <li>• Main technical-tactical foundations of volleyball, basketball, handball and indoor football</li> <li>• Psycho-socio-motor fundamentals</li> </ul>
Learning outcomes	<p><b>At the end of this learning unit, the student is able to :</b></p> <p>1 To demonstrate mastery of the main technical-tactical foundations of the four team disciplines taught (volleyball, basketball, handball and football). (1.2, 5.1, 5.2 and 5.3)</p> <p>To adopt effective and specific behaviors in relation to the different disciplines covered in the course (reading and writing of the game). (1.2, 5.1, 5.2 and 5.3)</p>
Evaluation methods	<p>Continuous evaluation and final practical evaluation with disciplinary tests to verify the achievement of learning outcomes.</p> <p>The final grade will be calculated by making the arithmetic average of the scores of the different learning activities/ sports disciplines to which the attendance coefficient has been previously applied, which may vary for each learning activity/sports discipline. A score of minimum 8/20 (after applying the attendance coefficient) for each learning activity/sports discipline is essential to validate the final grade.</p> <p>The conditions of the second session test will be identical to the first. The student must represent all the disciplinary tests evaluating the learning outcomes not acquired.</p>
Teaching methods	Practical course requiring active participation of the student.
Content	<p>Team sports</p> <p>At the end of this teaching entity, the student will theoretically and practically master the main technical-tactical foundations of the four collective disciplines taught (volleyball, basketball, handball and indoor football). He will be able to adopt effective and specific behaviors in relation to the different disciplines covered in the course (reading and writing the game).</p>
Other infos	<p>The evaluation is continuous. Active attendance at classes is therefore mandatory. Any absence must be justified by a medical certificate. If the medical certificate allows it, the student must also be present at the courses.</p> <p>In the event of unjustified absence from a course (excluding evaluation activity), the final score will be weighted in proportion to the percentage of attendance.</p> <p>Punctuality: three delays equivalent to an unjustified absence.</p> <p>Given the specificity of the bachelor's and master's degree and the professional recognition that obtaining the academic degree of the master's degree in Motor Sciences, physical education orientation automatically entails, we inform students enrolled in the bachelor's degree in Motor Sciences, that a presence of less than 60% in the EU LEPHY1105, even for justified medical reasons, will make the evaluation of the EU impossible with the consequence of the impossibility of acquiring the corresponding credits.</p> <p>Any unjustified absence from an evaluation results in an absence mark from the exam. In case of valid justified absence <a href="https://www.uclouvain.be/fr/facultes/fsm/restricted/certificats-medicaux">https://www.uclouvain.be/fr/facultes/fsm/restricted/certificats-medicaux</a>, a catch-up session could be organized if material and human conditions allow it.</p> <p>This course is strictly reserved for FSM students, its access is not possible for other UCLouvain students.</p>
Faculty or entity in charge	FSM
