

7.00 credits

15.0 h

Q1 and Q2

This learning unit is not open to incoming exchange students!

Language :	French
Place of the course	Louvain-la-Neuve
Main themes	<p>This seminar is part of the scientific supervision carried out by the dissertation supervisor and is aimed at ensuring student autonomy in the writing of their dissertation.</p> <p>It allows students to evaluate their progress in their research and enables the supervisor to make comments and offer advice.</p>
Learning outcomes	<p>At the end of this learning unit, the student is able to :</p> <ul style="list-style-type: none"> • Define a relevant research project in the framework of the master dissertation. • Master the principal methods of collecting and processing data. • Correctly utilize epistemological, methodological and editorial propositions in the framework of the master dissertation.
Evaluation methods	<p>The 7 credits of the dissertation seminar will be evaluated with a grade at the end of the first year of the master's degree ("Bloc Annuel 1") when the student complies with the following two requirements:</p> <ul style="list-style-type: none"> • By the beginning of November (the exact date may vary every year - cf. FIAL student timetable) of the first year of the master, the student will have filled the form which includes the subject of the intended dissertation. It has to be written in one of the two major languages on the programme and accompanied by a supervisor who has agreed to supervise the work. • By the first day of the June (or September) session of the first year ('bloc annuel 1'), the student will submit to his or her supervisor a document containing the following elements: (1) a detailed plan of the dissertation, (2) an explanation of the research question(s) as well as the envisaged methodology, (3) at least 4,000 words of the theoretical part, and (4) a bibliography containing at least 15 scientific references. <p>If generative artificial intelligence (AI) is used, it must be used responsibly and in accordance with academic and scientific integrity practices (cf. UCLouvain guidelines for the proper use of Gen AI). As scientific integrity requires that sources be cited, the use of AI must always be reported.</p> <p>Students who do not comply with these requirements will receive a fail mark.</p>
Teaching methods	The seminar is directed by the dissertation supervisor.
Content	The purpose of the seminar consists of supervision of the preparatory work for the master dissertation in the form of (1) meetings between the student and the supervisor and (2) possibly, depending on the supervisor, supervision group meetings. These meetings will be accompanied by personal readings, writing work on one section of the dissertation, as well as specific tasks (e.g., data collection) in the student's research.
