Q1 and Q2

**This learning unit is not open to incoming exchange students!**

Teacher(s)	Ruwet Coline ;
Language :	French
Place of the course	Louvain-la-Neuve
Learning outcomes	
Evaluation methods	Students register for the examination session for this module when they register for their dissertation defence (LOPES2298). The final assessment for the module is based on the master thesis' final grade.
Teaching methods	Group sessions are organised throughout the year, partly to support progress on the dissertation and partly to encourage the exchange of best practice amongst students. Individual sessions are organised for students whose project is not yet sufficiently developed or who are experiencing difficulties and would like some one-off support.
Content	The course aims to prepare students for academic work and, ultimately, for the completion and writing of their master thesis. The LOPES2203 course aims to provide ongoing support for students throughout the thesis process. In addition to the support provided by the supervisor and the support committee, the LOPES2203 course organises group monitoring of the dissertation process and the sharing of best practice among students, as well as arrangements for individual support.
Inline resources	Course materials and information on the course's Moodle site and in the learning agreement.
Bibliography	Van Campenhoudt, L., Marquet, J., & Quivy, R. (2017). <i>Manuel de recherche en sciences sociales-5e éd</i> . Dunod
Other infos	This activity is organized in accordance with teaching methods, timetables and organisational arrangements tailored to FOPES's specific audience.
