

28.00 credits

Q2

This learning unit is not open to incoming exchange students!

Language :	French
Place of the course	Autre site
Main themes	The Master Thesis is a personal and original piece of work. It serves as an introduction to research in the broad sense of the term, whether fundamental, exploratory, or applied. Its objective is therefore to contribute to the deepening of knowledge in the field of built and landscape heritage.
Learning outcomes	At the end of this learning unit, the student is able to : At the end of this teaching unit, students – in collaboration with his/her promotor, will be able to formalise a question relating to heritage conservation and restoration or scientific research directly linked to the conservation/restoration/conversion of immovable and landscape cultural heritage, structure and summarise their response, and communicate it orally, graphically and in writing.
Evaluation methods	Written summary and oral public presentation, assessed by a panel comprising the supervisors, lecturers and course coordinator during the June session (or August session in the event of failure). Possibility of completing the Master Thesis in pairs (multidisciplinary), with the prior agreement of the course lecturer.
Teaching methods	Regular presentations of research progress to course lecturers and supervisors.
Content	Choice and treatment of the subject, heuristics, written, graphic and oral summary of the work and research undertaken.
Faculty or entity in charge	FIAL
