Prerequisites	Students of the Master 120 in Management and in Business Engineering are required to complete a Final Master's Thesis (18 credits) and participate in the seminar accompanying the Final Master's Thesis (2 credits) designed to provide them with advice and generic bibliographic, methodological and editorial references useful for the realization of their Final Master's Thesis. Some students may be taught by the jury of the Final Master's Thesis support seminar (and the Final Master's Thesis will count for 20 credits) if they have already attended an equivalent seminar.
Main themes	Students have the opportunity to consult the subjects and themes of dissertations proposed by the professors of the LSM on the tools made available to them. Both students and promoters can initiate other themes. Then, the student and the promoter decide on the subject to be treated and define how to study it.
