

15.00 credits

Q2

This learning unit is not open to incoming exchange students!

Language :	English
Place of the course	Bruxelles Woluwe
Main themes	In the master thesis, students scope a pharmacological project, formulate critical research questions, define, and execute the project. Seminars are organized to help students understand the role of pharmacometrics in various disciplines and practice fields, with presentations by both experts and students, providing opportunities for feedback and skill development. Topics for the master thesis are introduced in Block 1 and can be suggested by experts from industry, clinical practice, regulatory bodies, or academia. Students choose their topic after meeting with a potential promotor, and the thesis is guided by a promotor and a daily supervisor.
