ARKE2M1 - Introduction

Introduction

Introduction

This course offers well-rounded learning outcomes in less specialised masters-level studies than the master 120.

The aim of this course is to further methodological and critical learning in the fields of archaeology and the history of art. The final assignment requires the student to focus upon a question relating to a given subject and apply the critical point of view and precision characteristic of a university education to it.

Your profil

This master can be completed in a year and will be of most interest to students with bachelor's degrees in other disciplines and mature students. The course also targets students with bachelor's degrees in the history of art and archaeology who do not wish to focus their studies on a particular specialism.

Your futur job

Our graduates are employed in:

- professions in the fields of heritage and archaeology: in archaeological digs, buildings archaeology, the management of listed buildings, artistic and archaeological collections or museums, heritage, conservation, speciality travel, exhibition organisation, etc.;
- the culture and communication sectors: in art galleries, trading in artworks, acting as experts, in restoration, providing advice, teaching and educational services, in cultural mediation, journalism, publishing, etc.;
- teaching and research.

Your programme

Students on this course will attend a series of mandatory classes in one of the following three electives: archaeology, history of art and archaeology.

ARKE2M1 - Teaching profile

Learning outcomes

Thinking and acting as a cultural critic, that is to say applying a reflective and critical approach to society through its past and present cultural and artistic output, is the main objective which students of the Master Degree in Archaeology and History of Art: General are called upon to achieve.

In this way, at the end of their programme, students will have an active and integrated expert understanding of a select corpus of disciplinary and multidisciplinary knowledge (awareness, terminology, issues, methods, conceptual frameworks) which is indispensable in order for them to become professionals in the different fields of archaeology and the history of art.

Students will be able to study and analyse a work or an object, a corpus, a site or a particular theme and undertake personal, objective and methodical research dealing with a significant quantity of information in accordance with disciplinary methods and by using a systematic and rigorous approach. Students will demonstrate the capacity to define a research subject and pose a research question, and will show their ability to focus upon a given question on the basis of quality heuristics and by using the principles of documentary criticism. Students will learn to operate independently by managing research and an individual project, and more generally by keeping their knowledge updated. The CP ARKE thereby wishes to train actors who are receptive to the cultural and socio-professional worlds and who are capable of understanding those worlds and integrating into them easily and efficiently.

On successful completion of this programme, each student is able to :

1. Think and act as a cultural critic: Apply a reflective and critical approach to society through its past and present cultural and artistic output.

- 1.1. Be an active citizen who is conscious of the global and socio-cultural issues at play in the examination of human output from the past and the present, by understanding their position in a complex socio-cultural and historical network;
- 1.2. Encourage society to understand the importance of its material and audio output by making it aware of the conservation and development of its heritage, while being open to artistic manifestations of modern cultures;
- 1.3. Demonstrate intellectual independence in reasoning, apply a critical eye to both material and intellectual output over a wide variety of collections (typological, chronological, geographical, etc.);
- 1.4. Think and act in a multidisciplinary and interdisciplinary way by being open to other conceptual and methodological frameworks with a view not only to gathering knowledge but also to being able to form hypotheses themselves.

2. Mastery of knowledge: Attain an active and integrated expert understanding of a select corpus of disciplinary and multidisciplinary knowledge (awareness, terminology, issues, methods, conceptual frameworks) which is indispensable in order to become an expert in the different fields of archaeology and the history of art.

- 2.1. Attain an expert grounding in various fields of archaeology and the history of art;
- 2.2. Attain specialist knowledge in either of the specific fields;
- 2.3. Starting from the basis of the knowledge acquired, contribute to the development of new hypotheses in the fields of archaeology and the history of art, in connection with professional practice in these fields.

3. Apply disciplinary methodologies: Study and analyse a work or an object, a corpus, a site, or a complex issue by calling upon archaeological and history of art methodologies and improving their critical eye.

- 3.1. Study a work or an object, a site, or a particular corpus using formal, technical, iconographical and iconological analysis methods employing different disciplinary approaches ;
- 3.2. Be capable of relocating the above in their historical and socio-cultural context and understanding the interactions and challenges affecting them ;
- 3.3. Reflect upon the contribution of new methods and develop these methods with a view to adapting them to various different situations.

4. Carry out research using a scientific approach: Successfully complete an original, individual research assignment dealing with a significant and varied quantity of data, using a rigorous and systematic approach.

- 4.1. Develop and deal with specific issues surrounding a given subject. Demonstrate clear and structured reasoning by applying and, where necessary, adapting the conceptual frameworks provided;
- 4.2. Carry out documentary research on a subject: collate a large quantity of data (secondary and primary sources) and select those that are most relevant;
- 4.3. Analyse a significant quantity of data: describe, organise and summarise it in a systematic and rigorous manner. Criticise and challenge the documents;
- 4.4. Examine the body of data in a relevant manner: apply disciplinary methodologies to it while also reviewing it using their own reflective and critical eye, developing a new, individual assignment relating to that issue;
- 4.5. Communicate the results of their research in a scientific and pedagogic manner.

5. Independently manage their work and developmental path: Demonstrate independence in managing a research project and an individual project, and more generally by keeping their knowledge updated.

- 5.1. Independently manage a research assignment using a scientific approach and employing the knowledge acquired in preparing questions relating to specific issues or research topics, including those which are multidisciplinary, where appropriate ;
- 5.2. Plan and manage their own path, making individual choices relating to their training;
- 5.3. Develop their intellectual curiosity: be interested by and open to developing perspectives and change, both as regards knowledge but also in relation to the methods for mediating that knowledge;
- 5.4. Conduct their own training: independently manage the acquisition and updating of their knowledge and know-how;
- 5.5. Manage their time and plan the steps necessary in order to carry out a project.

6. Be receptive to the cultural and socio-professional world: Understand the cultural and socio-professional worlds and integrate into them easily and efficiently.

- 6.1.
- 6.2.
- 6.3.
- 6.4.

Specific Admission Requirements

Specific Admission Requirements

1° Student must hold a first level university degree.

2° Provide proof of a sufficient level in French ([B1 of the European Framework of Reference](#) )

3° Student must have training including the following 120 credits:

- ⇒ 30 credits in general training courses and seminars;
- ⇒ 23 credits in introductory courses to the discipline;
- ⇒ 20 credits in art and civilisation courses;
- ⇒ 5 credits in courses in introduction to the scientific practice;
- ⇒ 3 credits in technology courses;
- ⇒ 24 credits in methodology courses;
- ⇒ 15 credits in ancient, medieval and/or modern languages courses.

The 30 credits of the [Minor in History of Art and Archeology \[30.0\]](#) satisfy these requirements.

If the student does not have enough training in one or several of these subjects, prerequisites will be added to the masters programme (maximum 15 credits).

If the total number of prerequisites exceeds 15 credits, access to the master is subject to the student passing an additional year, the programme of which is established based on the student's file.

Course equivalences are submitted for approval to the chairman of the jury, the secretary of the jury and the academic faculty secretary.

Teaching method

The departmental image service procures the necessary documents and makes available to students a data bank of images closely linked over the two levels.

Evaluation

The evaluation methods comply with the regulations concerning studies and exams (<https://uclouvain.be/fr/decouvrir/rgee.html>). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

Oral evaluation at the end of the semesters; no continuous assessment for the Master 60 (no seminars, tutorials, internships, trips or exercises).

Courses are evaluated according to current university regulations (see General Examination Regulations). Students may find further information on specific evaluation methods in the course descriptions.

To obtain a student's average, the grades awarded for each course unit are weighted by their respective credits

Mobility and/or Internationalisation outlook

No Erasmus exchange planned for the master 60.
